PROFILE

Experienced Full Stack Developer with 6 years of expertise in developing high-performance web applications, improving load times by 30%, and successfully launching 10+ applications across diverse industries. Highly proficient in Laravel, PHP, MySQL, AWS, and modern DevOps practices including CI/CD, Docker, and Git. On the frontend, proficient in React, JavaScript, TypeScript, and modern UI frameworks. Excited to use my varied development experience and technical skills in a challenging Backend Developer.

WORK HISTORY

Backend Developer – Snaarp (Cybersecurity Platform), Glasgow, UK

July 2025

Technologies: Laravel, PHP, MySQL, TypeScript, AWS, Git, Docker, RESTful APIs

- Building scalable and secure backend systems for a mobile-first cybersecurity platform aimed at SMEs globally.
- Designing and optimizing APIs and database structures to ensure data integrity, fast access, and encrypted transactions.
- Implementing CI/CD pipelines and Docker-based deployments to streamline development and release workflows.
- Collaborating with frontend and mobile engineers to ensure end-to-end integration of enterprise features including device management, file transfers, and encrypted backups.
- Supporting compliance and best practices for secure data processing and GDPR-readiness.

Backend Developer – Software Business Solutions Consulting (SBSC)

November 2024

Technologies: Laravel, PHP, MySQL, AWS, Git (Version Control), RESTful APIs

- Designed and implemented scalable backend systems and RESTful APIs to support various client projects and applications.
- Developed database schemas and optimized queries in MySQL to ensure efficient data storage and retrieval.
- Collaborated with front-end developers to ensure seamless integration between the client-side and server-side functionalities.
- Automated deployment processes and managed server configurations using AWS services.
- Utilized Git for version control, enabling effective collaboration and streamlined code management.
- Conducted thorough testing and debugging to ensure the delivery of high-quality software solutions.
- Played a key role in delivering critical projects on time, meeting stringent client requirements, and contributing to a 95% client satisfaction rate.

Full Stack Developer (Backend-Focused) – Hillcross College of Education, Johannesburg, South Africa July 2023

Technologies: React, JavaScript, TypeScript, Laravel, PHP, MySQL, Git (Version Control), AWS, Docker

- Spearheading the development and maintenance of web applications to enhance the college's digital presence and improve the user experience for students and staff.

- Collaborating with internal stakeholders to gather requirements and translate them into functional, user-centric web solutions.
- Developing responsive and interactive web interfaces using modern frameworks, ensuring cross-browser compatibility and performance optimization.
- Integrating backend APIs and services using Laravel and PHP, with seamless data management in MySQL.
- Utilizing Git for version control, ensuring efficient collaboration and codebase integrity.
- Managing application hosting and deployment on AWS, leveraging Docker for containerized development and scalability.
- Troubleshooting and resolving application issues to maintain uninterrupted service delivery.
- Delivered high-quality projects with a 98% on-time completion rate, earning commendations for technical excellence and reliability.

Full Stack Developer – MyLottoHub (Backend-Focused)

April 2023

Technologies: React, JavaScript, Laravel, PHP, MySQL, RESTful APIs, Git (Version Control), AWS

- Developed end-to-end solutions for MyLottoHub's platform, including frontend and backend systems, ensuring a seamless user experience for lotto players.
- Designed and implemented responsive user interfaces with React, ensuring cross-platform compatibility and high performance.
- Built and maintained robust backend services and APIs using Laravel and PHP to support dynamic lotto data and game functionalities.
- Integrated third-party APIs for live lotto results, payment gateways, and user authentication.
- Designed database schemas and optimized MySQL queries to handle large volumes of transaction and user data efficiently.
- Deployed applications on AWS infrastructure, ensuring scalability and high availability.
- Conducted code reviews, maintained version control with Git, and followed agile development practices.
- Played a vital role in increasing platform engagement by 30% through feature enhancements and performance optimization.

Edves Digital Solutions, Lagos. (Backend-Focused)

January 2022

Software Developer

- Develop and implement a standalone data extraction and main-application features for an education product.
- Designed and created a knowledge management platform using a knowledge graph, integrating PHP, Laravel, MySQL, JavaScript, and React.
- Reviewed codes, debugged problems and solved issues.
- Created and launched 5+ full-stack applications, which increased internal data processing speed by 40% and improved efficiency for educational clients.

Twinkle Idea Labs Limited

October 2019

Software Developer

- Developed full-stack applications across various platforms using latest industry-adopted

technologies and frameworks.

- Gained hands-on expertise in Bootstrap, CSS, HTML, PHP, MySQL, and various frontend frameworks
- Played a key role in the development, improvement, and operation of web-based software.
- Work closely with the app development team including project and product manager, developers, and QA to determine problems, testing methods, and best practices.

Delsmy Academy, Ilorin.

Dec 2018

Intern

- Delivered performance-driven and user-centric websites that meet all businesses requirements
- Gathered band defined customers' requirements to develop clear specification for creating well organized project plans
- Adjusted software parameters to boost performance and incorporate new features.

EDUCATION

B.Sc, Economics 2017

Adekunle Ajasin University

(2013 – 2017)

CERTIFICATION/TRAINING

Jobberman Soft Skills Training Certification

2020

SKILLS AND INTERESTS

- Leadership
- Strong organizational skills
- Proficient in code repositories, version control systems (Git), and cloud deployment (AWS, Docker).
- Problem Solver
